1 Partial formal specification in Z

The formal specification of the system introduces the following three types:

$SENSOR_TYPE, LOCATION_TYPE, TEMPERATURE_TYPE$

The system's (partial) formal specification is given in the Z language and it consists of schemas and the definitions of operations that constitute the system's exposed interface.

1.1 Schemas

TempMonitor

$deployed : \mathbb{P} SENSOR_TYPE$

$map : SENSOR_TYPE \rightharpoonup LOCATION_TYPE$

$read : SENSOR_TYPE \rightharpoonup TEMPERATURE_TYPE$

$deployed = \text{dom } map$

$deployed = \text{dom } read$

DeploySensorOK

$\Delta TempMonitor$

$sensor? : SENSOR_TYPE$

$location? : LOCATION_TYPE$

$temperature? : TEMPERATURE_TYPE$

$sensor? \notin deployed$

$location? \notin \text{ran } map$

$deployed' = deployed \cup \{sensor?\}$

$map' = map \cup \{sensor? \mapsto location?\}$

$read' = read \cup \{sensor? \mapsto temperature?\}$

ReadTemperatureOK

$\exists TempMonitor$

$location? : LOCATION_TYPE$

$temperature! : TEMPERATURE_TYPE$

$location? \in \text{ran } map$

$temperature! = read(map^{-1}(location?))$

<i>Success</i>
$\exists TempMonitor$ $response! : MESSAGE$
$response! = 'ok'$

<i>SensorAlreadyDeployed</i>
$\exists TempMonitor$ $sensor? : SENSOR_TYPE$ $response! : MESSAGE$
$sensor? \in deployed$ $response! = 'Sensor\ deployed'$

<i>LocationAlreadyCovered</i>
$\exists TempMonitor$ $location? : LOCATION_TYPE$ $response! : MESSAGE$
$location? \in \text{ran map}$ $response! = 'Location\ already\ covered'$

<i>LocationUnknown</i>
$\exists TempMonitor$ $location? : LOCATION_TYPE$ $response! : MESSAGE$
$location? \notin \text{ran map}$ $response! = 'Location\ not\ covered'$

ReplaceSensorOK	<hr/> $\Delta \text{TempMonitor}$ $\text{oldSensor?} : \text{SENSOR_TYPE}$ $\text{newSensor?} : \text{SENSOR_TYPE}$ $\text{location?} : \text{LOCATION_TYPE}$ $\text{temperature?} : \text{TEMPERATURE_TYPE}$ <hr/> $\text{oldSensor?} \in \text{deployed}$ $\text{newSensor?} \notin \text{deployed}$ $\text{location?} = \text{map}(\text{oldSensor?})$ $\text{deployed}' = (\text{deployed} \setminus \{\text{oldSensor?}\}) \cup \{\text{newSensor?}\}$ $\text{map}' = (\text{map} \setminus \{\text{oldSensor?} \mapsto \text{location?}\}) \cup \{\text{newSensor?} \mapsto \text{location?}\}$ $\text{read}' = (\text{read} \setminus \{\text{oldSensor?} \mapsto \text{temperature?}\}) \cup \{\text{newSensor?} \mapsto \text{temperature?}\}$ <hr/>
$\text{GetAllLocationsAndTemperaturesOK}$	<hr/> $\Xi \text{TempMonitor}$ $\text{locationsAndTemperatures!} : \text{LOCATION_TYPE} \rightharpoonup \text{TEMPERATURE_TYPE}$ <hr/> $\text{locationsAndTemperatures!} = \{l : \text{ran map} \bullet l \mapsto \text{read}(\text{map}^{-1}(l))\}$ <hr/>
SensorNotFound	<hr/> $\Xi \text{TempMonitor}$ $\text{sensor?} : \text{SENSOR_TYPE}$ $\text{response!} : \text{MESSAGE}$ <hr/> $\text{sensor?} \notin \text{deployed}$ $\text{response!} = \text{'Sensor not found'}$ <hr/>

1.2 Operations

$$\begin{aligned} \text{DeploySensor} &\hat{=} \\ &(\text{DeploySensorOK} \wedge \text{Success}) \oplus \\ &(\text{SensorAlreadyDeployed} \vee \text{LocationAlreadyCovered}) \end{aligned}$$

$$\begin{aligned} \text{ReadTemperature} &\hat{=} \\ &(\text{ReadTemperatureOK} \wedge \text{Success}) \oplus \text{LocationUnknown} \end{aligned}$$

$$\begin{aligned}
\textit{ReplaceSensor} &\hat{=} \\
&(\textit{ReplaceSensorOK} \wedge \textit{Success}) \oplus \\
&(\textit{SensorNotFound} \vee \textit{SensorAlreadyDeployed})
\end{aligned}$$

$$\begin{aligned}
\textit{GetAllLocationsAndTemperatures} &\hat{=} \\
&\textit{GetAllLocationsAndTemperaturesOK}
\end{aligned}$$
